

Allsteel®

Workspace Solutions

Allsteel. Never sit still.

At Allsteel, we're always looking for smart solutions to your everyday challenges. Our goal isn't simply to design the next new system. It's to find a better way to work. It's not only about creating a beautiful chair. It's about making you comfortable so you're free to reach your full potential. And it's not just about building an efficient workspace. It's about helping you imagine ways to do even more, more effectively.

We believe our products should address and solve problems, which is why we include customer feedback throughout our entire design process. When design is purposeful, the result is inspiring.

Our furniture is made to improve productivity, make offices more efficient, increase comfort, and make day-to-day tasks that much easier. So your employees can stay focused on the important stuff. And because we have integrated Rapid Continuous Improvement, environmental awareness, recycling, and conscientious materials selection, Allsteel products contribute not just to this lifetime, but to the next as well.

We have distinguished ourselves with award-winning products such as Acuity® seating; Stride® panels, desking, storage, and benching; and Gather™ and Involve®, unique solutions designed to bring people together in the workplace. Allsteel was the first office furniture manufacturer to have all products certified either Indoor Advantage™ or Indoor Advantage Gold and BIFMA level®, and the majority of the line can contribute to LEED® credits.

Systems & Tables

**You'll find function and style
everywhere you look.**

Functionality, flexibility, and style are built into every Allsteel systems product. They're thoughtfully designed to be easy to configure and install, as well as easy to reconfigure and restyle. So you'll always get the most out of your investment. We've covered every base, from learning furniture to conference tables to solutions that enhance systems furniture.

Stride®

Take your environment further.

Stride offers great design for the environment, for a variety of workers, and for changing business needs. This comprehensive collection of surfaces, storage, and traditional and light-scale space division creates productive and inspiring workspaces that support different tasks and worker generations. A flexible kit-of-parts works together throughout the entire office to respond to changing needs, from traditional panel-based workstations and high-performance private offices to benching applications for collaborative teams or mobile workers. Stride was designed from the ground up to incorporate the most sustainable practices at every step.

Terrace DNA™

Building blocks for a better office.

Terrace DNA offers flexible space-planning solutions to create a variety of design applications and work environments for each worker and workstyle. Build different workspaces from open, light-scale, collaborative worksettings with lower panel heights to more private spaces with higher panels. Terrace DNA offers more aesthetic differentiation and increased design flexibility at a competitive price. Load it up with storage or slim it down for space efficiency. It delivers the building blocks for a better, more beautiful office.

Concensys®

The stronger, faster, friendlier solution.

Concensys offers fast and easy specification, installation, and reconfiguration. Workstations are built with all-metal construction to provide strength and durability for a lifetime of use. Panels are fully assembled and feature all-metal construction, including metal panel connectors, top caps, and kickplates. Plus, Concensys delivers fast to meet changing business needs. A range of fabric and finish options allows for flexible design solutions. Concensys offers the best price-to-performance ratio of any comparable system in its class.

Cadence®

Flexible freestanding desking.

Cadence offers freestanding desks, credenzas, and storage to create versatile space that lets you move smoothly from conferencing to the computer, from face time to heads-down work. It features durable, long-lasting, heavy-gauge steel construction, and a selection of surface materials to complement the panel-based environment. Simplified specification and installation get offices up and running quickly.

Reach®

The right storage in the right place.

Reach integrates files, drawers, shelves, and overheads into two-sided storage space division, which becomes the foundation for individual workstations and the entire floorplan. Because storage is integrated into the wall, there are unique space savings and design opportunities. Files, peripherals, and electronics are out of the way, creating a more open work area. Worksurfaces can be set at any height to meet individual preferences. And because panels aren't supporting overhead storage, they can be lower, improving the flow of air and light. Reach works with Stride and Terrace DNA.

Merge®

Where people and projects come together.

Merge tables include advanced functionality that adjusts to the way you work. Adaptive tables provide instant work and meeting space. Conference rooms benefit from Power Bay™ tables that have a built-in center area for power and storage. For a change of posture throughout the workday, Lift & Release™ legs offer easy height adjustment, while standing-height tables are perfect for project work and café areas. Merge makes it easy for people to collaborate inside and outside their offices.

Aware™ and Get Set®

As flexible and functional as you are.

Aware flip-top, folding, and fixed tables offer a range of leg shapes, sizes, and finishes perfect for a variety of applications, including training rooms, education environments, private offices, and open-plan meeting areas.

Get Set tables, presentation boards, and seating work anywhere that meetings are held or information is exchanged. Tables and seating fold, nest, move, and store with unparalleled ease and functionality. Get Set is easy to reconfigure, making it perfect for learning and training environments.

Collaboration

Where ideas meet.

Gather instantly makes spaces more productive, more comfortable, and more relevant. From tables to seating, technology to space division, it provides a comprehensive lineup of solutions. Gather pieces are intuitive and functional, and fit the postures that people naturally take. So you can collaborate and work the way you want.

Storage & Accessories

A place for everything.

Allsteel is where the lateral file was invented, and we've been refining storage systems ever since. Our storage solutions are designed to maximize personal organization and productivity, simplify planning, and make offices more efficient. We give our storage solutions the capacity and adaptability you need for your busy workplace.

Align™

Take storage to a whole new level.

Pick and choose, mix and match. Whatever form your storage requirements take, you can be sure you'll find something that matches your needs, your taste, and all the components in your office. Even if you prefer your storage on wheels. Material options include Landscape™ surfaces, painted metal, and veneer across a selection of laterals, pedestals, towers, and combination cabinets. And behind the beauty, you'll find storage products designed to handle the everyday demands of the productive office.

Involve®

Share work as it happens.

Involve brings together all the things you need to make work areas more productive, efficient, and collaborative. It incorporates soft seating into the primary workspace to encourage interaction, and multi-dimensional laminate storage options to support active work. Involve's modular design accommodates all the different ways work gets done, from heads-down, focused work to impromptu conversations. It integrates seamlessly with Terrace DNA and Stride panels with an inspiring mix of materials and finishes.

Persona™

Personal storage with distinct style.

Persona offers efficient storage options, including individual drawer locking for shared (hoteling) applications and lateral files that are available with multiple drawer sizes for storing everything from project folders to desk items. Create a wide variety of configurations and add personalized details on pull styles, paint colors, drawer configurations, and more.

Essentials™

Designed to handle critical storage needs.

Essentials storage offers convenience, capacity, and durability with features such as ball-bearing drawer suspension, full-steel construction, and choices in pull styles and paint colors. Laterals, pedestals, personal files, bookcases, overheads, and personal towers are designed to cover the most practical storage needs.

Workplace Personalization

Make more of your personal space.

Inspired accessories keep offices organized, comfortable, and productive. Painted wood or laminate storage includes project drawers, overhead bins, unique cantilever storage, and toyboxes with sliding tops. Extensions™ work tools offer everything from pencil holders to paper trays. Ergonomic solutions include Altitude® height-adjustable tables and worksurfaces, monitor arms, and keyboard platforms. And to keep work areas properly lit, choose stylish Link™, Wand™, and Reed™ LED lighting.

Seating

Seating that keeps you working in comfort and style.

Allsteel offers seating solutions that fit your organization, office environment, and staff preferences. Every chair is designed with user comfort in mind and engineered for long-lasting, durable performance. The Allsteel offering includes chairs in a range of styles that complement any space design and every work application.

Work seating

Allsteel work seating provides ergonomic features essential for comfort and productivity. With a range of aesthetics and a variety of functions, there is a seating solution for every person, every task, and every style.
